The General Problems of Psychology

By ROBERT MACDOUGALL, Ph.D.

Professor of Psychology in New York University

Contents : The general problems of science. The general task of intelligence. The abstractions of reflection. The approach to empirical truth. Psychology and the system of knowledge—and the self of intuition—and the arts of life. The field—the limits—the methods—the data—the problems—of psychology.

"A book of quite unusual quality . . . a thorough and comprehensive study of this subject . . . written with knowledge of all the important discussions past and present regarding the nature and problems of psychology . . . a very able, scholarly piece of work."

8vo, x + 464 pages, cloth-bound : price, \$5.00.

The Ground and Goal of Human Life

By CHARLES GRAY SHAW, Ph.D.

Professor of Ethics in New York University

Contents : The ground of life in nature: the naturalization of life; the struggle for selfhood. The goal of life in society: the socialization of life; the repudiation of sociality. The higher synthesis: the joy of life in the world-whole; the worth of life in the world-whole; the truth of life in the world-whole.

"Many readers will be ready to take up the gauntlet which Professor Shaw throws down as a challenge to most current ideals and preconceptions. But the call to battle is in itself stimulating; and Professor Shaw's presentation of his case is far from shallow and unconsidered. . . . Moreover, it is a positive and too rare joy to find a book with exact footnote references, and one so richly endowed with knowledge of the history of thought and literature.

8vo, xii + 594 pages, cloth-bound : price, \$3.50.

Values, Immediate and Contributory, and their Interrelation

By MAURICE PICARD, Ph.D.

8vo, x + 198 pages, cloth-bound : price, \$3.00.
